

64. Minimum Path Sum

Given a $m \times n$ grid filled with non-negative numbers, find a path from top left to bottom right, which minimizes the sum of all numbers along its path.

Note: You can only move either down or right at any point in time.

Example 1:

1	3	1
1	5	1
4	2	1

- **Input:** grid = [[1,3,1],[1,5,1],[4,2,1]]
- **Output:** 7
- **Explanation:** Because the path $1 \rightarrow 3 \rightarrow 1 \rightarrow 1 \rightarrow 1$ minimizes the sum.

Example 2:

- **Input:** grid = [[1,2,3],[4,5,6]]
- **Output:** 12

Constraints:

- $m == \text{grid.length}$
- $n == \text{grid}[i].\text{length}$
- $1 \leq m, n \leq 200$
- $0 \leq \text{grid}[i][j] \leq 200$
