

82. Remove Duplicates from Sorted List II

Given the head of a sorted linked list, delete all nodes that have duplicate numbers, leaving only distinct numbers from the original list. Return the linked list sorted as well.

Example 1:

Input: head = [1,2,3,3,4,4,5]

Output: [1,2,5]

Example 2:

Input: head = [1,1,1,2,3]

Output: [2,3]

Constraints:

- The number of nodes in the list is in the range [0, 300].
- $-100 \leq \text{Node.val} \leq 100$
- The list is guaranteed to be sorted in ascending order.
