# 234. Palindrome Linked List

Given the head of a singly linked list, return true if it is a palindrome or false otherwise.
Example 1:

Input: head = [1,2,2,1]

Output: true

Example 2:

Input: head = [1,2]

Output: false

Constraints:

- The number of nodes in the list is in the range $[1, 10^5]$.
- $0 <= Node.val <= 9$

Follow up: Could you do it in O(n) time and O(1) space?
