183. Customers Who Never Order

Table: Customers

Column Name	Type
id	int
name	varchar

- id is the primary key (column with unique values) for this table.

- Each row of this table indicates the ID and name of a customer.

Table: Orders

Column Name	Type
id	int
customerId	int

- id is the primary key (column with unique values) for this table.

- customerId is a foreign key (reference columns) of the ID from the Customers table.

- Each row of this table indicates the ID of an order and the ID of the customer who ordered it.

Write a solution to find all customers who never order anything.

Return the result table in any order.

The result format is in the following example.

Example 1:

Input:

Customers table:

id	name
1	Joe
2	Henry
3	Sam
4	Max

Orders table:

id	customerId
1	3
2	1

Output:

Customers
Henry
Max
